-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 21 April 2005.  
 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

### DETAILED ACTION

The disclosure is objected to because of the following informalities: The amended paragraph to page 6, line 18 to page 7, line 1 is objected to, since in lines 2-3 of this paragraph, "hole 2" should read --plate 2--, and "plate 21" should read --hole 21--.

Appropriate correction is required.

Claim 5 is objected to because of the following informalities: In claim 5, lines 3-4, there is no antecedent basis for "said key hole". See also the occurrences in claim 5, lines 6 and 8. Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steinbach in view of Heinz.

Steinbach teaches an inner shaft body 28 and 24 having a keyhole 28A and a protrusion 28D which is received in a recess 18D of an anti-drill plate 18, the plate 18 having a non-circular through hole 18A matching the keyhole 28A, wherein the protrusion 28D is capable of fracturing upon exposure by a drill to the plate 18. As seen in figs. 9-11 of Steinbach, the material from which the protrusion 28D is comprised is weaker than the material of the drill plate 18. Heinz teaches a plate 34 having a protrusion 37 which extends through a key-insertion hole 33 of an adjacent plate 30. It

Art Unit: 3676

would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute a protrusion which extends through the keyhole 18A of the anti-drill plate 18 of Steinbach for the protrusion 28D of Steinbach, in view of the teaching of Heinz, the motivation being that the separately formed recesses 18D of Steinbach would not be required. With respect to claim 6, it would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize the claimed quantitative value, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Applicant's arguments with respect to claims 5 and 6 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3676

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
